

Source: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Referrer-Policy>

Headers	Purpose	IE/Edge Support	Chrome Support
<b>no-referrer</b>	No referer information is sent with the requests.	No	Yes
<b>no-referrer-when-downgrade</b>	This is the default setting. The origin, path and querystring are sent as the referer when the security level stays the same or upgrades. HTTP-->HTTP HTTPS-->HTTPS HTTP-->HTTPS	No	Yes
<b>strict-origin</b>	Only send origin of the document as the referer for requests where the security level remains the same HTTPS-->HTTPS	No	Yes
<b>strict-origin-when-cross-origin</b>	Send origin, path and querying string for a same origin request, only send origin when security level stays the same and send nothing to a less secure destination	No	Yes
<b>same-origin</b>	Only send referer for same site origins	No	Yes
<b>origin</b>	Only send origin of the document as the referer	No	Yes
<b>origin-when-cross-origin</b>	Send the full origin, path and query string for requests of same origin, but only send the origin as the referer for other requests	No	Yes
<b>unsafe-url</b>	Send the origin, path and query string no matter what.	No	Yes
